SECURITY

In the area of Internet security Coordination Center interacts with:

➢ **The League for Safer Internet.** The organization's area of expertise includes combating negative online content, especially child pornography. The League for Safer Internet is one of the most effective non-governmental organizations counteracting negative online content.

➢ **Group-IB.** The organization's area of expertise includes combating the use of domain names for the purposes of phishing, unauthorized access to third-party information systems, malware distribution, and controlling botnets. Group-IB is a nongovernmental organization providing information security incident investigation.

On 30 May 2012, the Coordination Center for TLD RU/РФ has hosted a practical workshop for law enforcement officers

➢ The officials from various law enforcement agencies were able to learn more about Internet governance, address space, protocols and domains.
➢ Legal aspects of communicating in the Internet were discussed during the workshop.
